

Dear Mayor Pucci and Monroe Planning Board:

I support PARKER at Monroe on Schoolhouse Road.

The proposed long-term care residence on Schoolhouse Road would be an enormous benefit for the growing senior community. I anticipate that my family and friends will one day require the services that PARKER provides. I can't stress how important it is to have residential long-term care services like this close by.

*[Insert information on your circumstances and why Parker at Monroe will be valuable for you or your family or select the following.]*

Optional messages:

- I personally experienced or heard about PARKER's extraordinary care over the years.
- The many seniors who need long-term care should be welcome as residents in a residential neighborhood.
- I have read that already more than 300 residents in Monroe Township are on a waiting list for Parker services.
- The project will bring much-needed jobs to our township.
- We need these services for our seniors so we can age in place without being forced to leave friends and family, and our community, if and when we need long-term care.
- For more than 100 years, Parker, a non-profit organization, has provided the highest quality of care. The organization's Eden philosophy employs nature and respects aging as a natural stage of life.
- The project will be set back from the road and more than half of the 28-acre site will be preserved. Another four acres near the residences will be preserved as well. The facility will employ Green technology, state-of-the-art architecture, and protect the natural beauty of the area. I don't know of any other proposed development that has such a commitment to open space preservation.
- Parker at Monroe will create affiliations with local hospitals and practitioners as well as provide volunteer and educational opportunities for those interested in health care.
- Parker has been a good neighbor in the towns with other Parker residences: Highland Park, Piscataway and New Brunswick.

Suggested conclusion:

Please show your support for seniors by voting YES and encouraging your colleagues in the Planning Board to do the same to bring this needed resource to the community.
